Pointer Variables

- The first step in understanding pointers is visualizing what they represent at the machine level.
- In most modern computers, main memory is divided into *bytes*, with each byte capable of storing eight bits of information:

0 1 0 1 0 0 1 1

- Each byte has a unique *address*.

The interface includes a top bar with "You are viewing Fatima Khanam's screen" and "View Options". A "Participants (2)" panel on the right lists "012 Mohammad Enayet(Me)" and "Fatima (Khanam)(Host)". The bottom toolbar contains "Unmute", "Start Video", "Participants", "Share Screen", "Chat", "More", and "Leave Meeting". A "Raise hand" button is visible in the bottom right corner.
